

AITOR VÉLEZ

QA SPECIALIST

PROFILE

Passionate about elevating software quality across diverse tools and platforms. With hands-on experience testing a wide range of applications—from internal utilities to customer-facing solutions—I bring a user-centric mindset that bridges technical functionality and end-user experience. I've contributed to high-performing teams where I played a key role in defining and executing quality assurance strategies. I thrive in dynamic, tech-driven environments that challenge me to grow both professionally and personally.

WORK EXPERIENCE

Activision Blizzard King (Microsoft)

Feb 2024- Present

QA Specialist

- Engage in all stages of the software development lifecycle, ensuring high-quality standards across gaming platforms.
- Develop comprehensive test cases and plans, focusing on exploratory, functional, integration, and regression testing.
- Collaborate closely with developers to provide feedback, mentor on best practices, and support feature verification.
- Apply risk-based testing methods to prioritize efforts based on impact and likelihood.
- Design and report QA metrics to track performance indicators, informing stakeholders and driving improvements.

Gaming Labs International

Feb 2023- Feb 2024

Test Engineer I

- Ensured gaming products met industry standards through deep technical expertise and thorough testing.
- Conducted extensive quality assurance tests to identify and rectify potential issues in gaming products.
- Managed testing projects within budget and timeline constraints, ensuring milestone achievement.
- Maintained professional client relationships, proactively communicating testing statuses and outcomes.
- Documented test methods and results, supporting high-quality standards and best practice development.

iVoox Global Podcasting

Apr 2022 - Feb 2023

Junior QA Support

- Tested the iVoox app rigorously to identify and report bugs, contributing to continuous improvement.
- Provided technical support to users, ensuring swift and effective resolution of issues.
- Collaborated in an agile environment with developers, product managers, and stakeholders to address issues promptly.
- Worked closely with development teams to prevent errors by applying manual software testing best practices.

INTERESTS

- Sport is one of my main interests, as it helps me disconnect and focus on physical activity. I see it as both a healthy and social activity.
- I really enjoy going to the cinema, especially science-fiction films, which I find particularly captivating.
- I'm very fond of travelling, meeting people, and exploring new places. I also really enjoy driving.
- And of course, video games are my true passion.
